

Will AI Replace You — or Will You Run It?

AI is already changing every job in the energy sector. The people who stay relevant won't be the ones who waited — they'll be the ones who learned to use it first. Accredited, internationally aligned micro-learning through Centenary Networks (QCTO) lets your people build the skills to stay ahead — in short, focused bursts, at their own pace.

Accredited · Internationally Aligned Curriculum · Boost Your Scorecard

Why this works for SPS

Micro-learning, not marathons.

Short, focused lessons your people fit around their work — minutes, not months. No one comes off the job for a qualification they may never finish.

Internationally aligned, locally accredited.

Curriculum benchmarked to global standards, delivered through Centenary Networks (QCTO-accredited) — credible to your people and recognised nationally.

Boost your scorecard.

Delivered through an accredited provider, so training spend supports your skills development scorecard — recognised, documented, claimable.

Credits that stack.

Every micro-learning unit is credit-bearing and builds over time toward a national qualification — so people progress at their own pace, as far as they want to take it.

For everyone.

Open to all your people — one programme, one standard, across every team.

Put your people in the driver's seat

AI is changing how the energy sector works — and the people who get ahead of it will shape where it goes. Bite-sized, accredited micro-learning lets your people choose what to learn, build credits on their own schedule, and ladder toward a national qualification. Not training handed down — a path they own.
